Zinpro Corp. Announces Completion of New Plant

Significant investment allows company to double its production capacity

EDEN PRAIRIE, Minn., (Jan. 20, 2009) – Zinpro Corporation recently announced the completion of its third manufacturing plant. Located in Garner, Iowa, the new facility doubles the company’s overall production capabilities and provides additional warehouse space.

“Expanding our manufacturing capacity allows us to better meet the production demands of our growing business,” said Bill Scrimgeour, president and chief operating officer, Zinpro Corporation. “This state-of-the-art facility features improvements in equipment, technology and processes – all designed to deliver the highest quality trace mineral products in the industry.”

The new facility was constructed adjacent to the original Garner manufacturing plant which opened in 1993. Zinpro Performance Minerals® are also manufactured at the company’s production facility located in North Branch, Minn.

All three highly-specialized production facilities feature quality control laboratories on-site, helping ensure that every pound or kilogram of Zinpro Performance Minerals exceeds the highest industry standards for quality, safety and efficacy. In addition, Zinpro Corporation proudly participates in numerous quality assurance certification programs including: ISO 9001:2000, HACCP, FAMI-QS, FCI and Safe Food/Safe Feed.

As the leader in trace mineral nutrition, Zinpro is committed to delivering the products and educational tools needed to help customers improve the performance and profitability of their operation. For more information, visit www.zinpro.com or call 952-983-4000.
