

More Robust Pigs for a More Robust Return

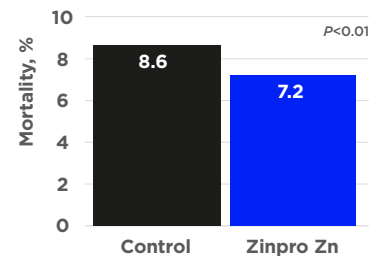

1% Reduction in Mortality

The profitability of your system starts from day one. Improving nursery pig health with Zinpro® Zinc reduces mortality by building immune competence with power post absorptive effects, leading to improved livability and accelerated growth for greater productivity and profitability.

Mortality Reduced in Conventional Nursery

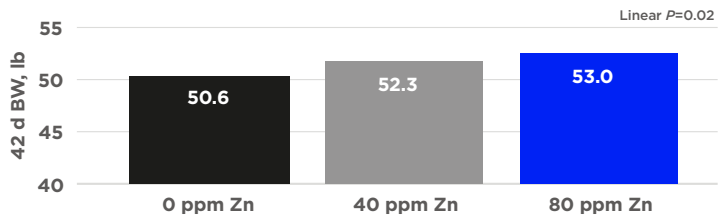

Mortality Reduced in Antibiotic-Free Production

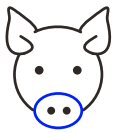

Greater Gain. Greater Throughput.

Getting weaned pigs off to a solid start is paramount to boosting your value capture opportunity and ensuring system profitability. Including Zinpro Zinc can increase nursery exit weight allowing you to generate greater system throughput.

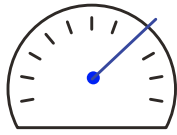

Improve Nursery Pig Exit Weight with Zinpro Zinc

More Robust Pigs for a More Robust Return

More Pigs More Weight More Profit

Why sacrifice performance for health when you can have both?

You carry the responsibility of uncovering every opportunity to improve pig health and produce more marketable pork to secure a sustainable economic outlook. Zinpro unlocks your pigs' full potential so you can achieve desirable performance and productivity goals for maximum value throughput.

The Right Zinc

Fueling your pigs with the best nutrition available starts with your zinc source. With more than 50 years of proven research, Zinpro® Zinc is the only zinc source on the market able to ensure powerful post absorptive effects which enhance immune function and allow pigs to perform to their potential. Whether it be delivered through a diet or a water system Zinpro Zinc offers maximum performance and a more profitable production system.

Partner with Zinpro

With more than 50 years of proven research and on-farm expertise, our team of swine experts is ready and available to support your production goals. With industry leading tools and insight, Zinpro is positioned to help optimize performance
