## FORTIFY THE FUTURE™

Since 1971, sustainability has been the heart of our mission. Fortify the Future™ is our ongoing commitment to sustainability in all we do, fortifying animals, communities and the earth - now and for generations to come.

Zinpro nutritional solutions make up less than 0.5% of a typical animal diet but result in 2-9% improvement in feed efficiency and improvements in many measures of productivity and animal health, while decreasing environmental emissions intensity by 3-8%.

Anderson Foundation was created to honor the giving spirit of Dean and Mary Anderson, the founders of Zinpro Corporation, a Minnesota-based nutrition solutions company serving the health and wellbeing of animals and people globally. Since 1992, we have reinvested a portion of the Zinpro profits back into the global community, focusing on creating opportunities for girls and women. We partner with grassroots organizations to empower girls and women to complete schooling, navigate everyday social and economic obstacles, and lift their communities.
